

ASX Announcement**9 August 2018****BOOM2 UPDATE**

Intiger Group Limited (**Intiger** or the **Company**) (**ASX:IAM**) is pleased to provide the below update regarding our BOOM2 software, following a recent investor query subsequent to the release of our Market Update on the ASX platform on 30 July 2018.

BOOM2 is currently comprised of four main modules:

1. A client-friendly interactive data collection tool module;
2. Digital administration templates to aid in completing and finalizing data collection prior to the provision of financial advice module;
3. Advice request module; and
4. Automated Statement of Advice production module.

Like all software developers, we continue to listen to the feedback from our clients and their needs and make enhancements to the various modules when needed, including, possibly adding new modules.

In November 2017, modules 1 and 3 went live with selected clients whilst the other two were subject to both internal and field testing. Clients selected the modules for use based upon their own individual needs.

Module 2 has been completed but as it integrates with Module 4, its release to clients will be contemporaneous with Module 4.

In our Market Update released on 30 July 2018 in conjunction with our Appendix 4C, we noted that it is now planned that the advice scenarios module (i.e. module 4) will be going "live" in Quarter 3 2018 for the CBA pilot program and other select clients. We reiterate that this is a planned schedule and we will keep the market informed should there be any change to this.

We would expect that the clients taking up Module 4, the "Automated Statement of Advice production module", would take up all modules to efficiently use the full effectiveness of BOOM2.

About Intiger Group Limited

The business of **Intiger Group Limited (ASX: IAM)**, was founded by experienced investment banking and financial services executive Mark Fisher and operates an Australian software development house dedicated to supporting professional Financial Planners to meet the needs of their clients. Intiger does this by reducing the back office and operational costs within the Australian financial planning industry. Working with Australian Financial Services Licensees and their advisers, the Intiger Group has developed and launched proprietary software platform BOOM2, which has been designed to digitise and automate core components of the financial planning process including the production of automated statements of advice. BOOM2 also tracks key performance indicators of a financial planning practice and delivers oversight and control to both licensees and financial planning practices nationally.
